

Sales by Genre

History generated the highest Q1 sales, followed by Sci-Fi and Non-Fiction. The West region contributed strongly across most genres, making it a key region to maintain and prioritise in Q2.

Regional Performance Overview

The **West** region significantly outperformed all other regions in Q1, while the South region had the lowest sales. Q2 planning should focus on sustaining West performance and investigating why South is underperforming.

State Performance Overview

Nevada, Massachusetts, New York, and Colorado were the strongest-performing states by sales. These states may be useful focus areas for Q2 regional campaigns and stock planning.

Weekly Sales Trend

Weekly sales **fluctuated across genres** throughout Q1, with different genres peaking at different points. This suggests that customer demand varied week by week, so Q2 promotions could be planned around genres with stronger weekly spikes.

Publisher Performance

Publisher_013_Name generated the highest Q1 sales, making it the strongest publisher partner for the quarter. **Publisher_058_Name** had the lowest sales, so Q2 planning should review whether this reflects lower demand, stock availability, or weaker regional performance.

Average Sales Per Order Per Region

The **West** region had the highest average sales per order, followed by East and Central. The South region had the lowest average order value, suggesting an opportunity to increase basket size through bundles, promotions, or targeted recommendations.

Sales by Order Size

Large orders generated the highest sales by a significant margin, followed by medium and small orders. This suggests that higher-quantity orders are a major driver of Q1 revenue, so Q2 promotions could encourage customers to buy in bundles or larger quantities.

Genre vs Region

Region	Genre								Sales
	Children	Fantasy	Fiction	History	Mystery	Non-Fic..	Sci-Fi	Self-Help	
Central	12,413	18,538	22,537	17,580	28,206	10,766	23,022	20,973	 1,76572,488
East	17,349	26,531	22,440	38,923	16,885	41,723	25,853	15,222	
South	8,877	11,864	10,270	13,682	11,670	1,765	14,567	6,817	
West	35,645	53,786	46,127	72,488	32,506	62,938	67,869	65,240	

The **West** region showed the strongest sales across every genre, with **History**, **Sci-Fi**, **Self-Help**, and **Non-Fiction** performing especially well. The South region was consistently the weakest across genres, suggesting it may need closer investigation before Q2 planning.

Sales vs Quantity

Sales generally increased as quantity increased, showing a **positive relationship** between order size and revenue. A few orders stood out as high-sales or high-quantity outliers, which may be worth reviewing to understand what drove larger purchases.

Running Total Q1 Sales

Cumulative sales grew steadily throughout Q1, with the **West region maintaining the strongest growth**. East and Central showed moderate growth, while South remained the lowest-performing region throughout the quarter.
